→ HAC OVERVIEW QUESTIONS

24 March 1983

QUESTION AREA: Covert Action, (or whatever, in initial caps)

QUESTION 1. The following is an example. Now is the time for all good men to come to the aid of their country. Is this really the question? (classify)

ANSWER.

Now is the different approach that we will try for a while to see if you like this better. This is indented 5 spaces. (Overall class. for sub-para. here)

-- If you have a tick, start with 2 dashes at the margin and remember to block in the paragraph.

- If you should go further down to another subdivision, please use 1 dash and again continue to block....this dash is indented 10 spaces.

-- More than these is ridiculous, but continue with this form if needed.

Each subsequent paragraph will be indented 5 spaces and again carried out to the margin. (classify)
